DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 22-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 22-27 are drawn to functional descriptive material NOT claimed as residing on a computer readable medium. MPEP 2106.IV.B.1(a) (Functional Descriptive Material) states:

Data structures not claimed as embodied in a computer-readable medium are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer.

Such claimed data structures do not define any structural or functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized.

Claims 22-27, while defining a computer program, do not define a "computer-readable medium" and is thus non-statutory for that reason. A computer program can range from paper on which the program is written, to a program simply contemplated and memorized by a person. The examiner suggests amending the

Art Unit: 2625

claim to embody the program on "computer-readable medium" in order to make the claim statutory (e.g. "a computer-readable medium storing a computer program...").

In contrast, a claimed computer-readable medium encoded with the data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory." - MPEP 2106.IV.B.1(a)

Allowable Subject Matter

3. Claims 1-21 are allowed.

4. Claims 22-27, insofar as they are understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 USC §101 set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 1, 16, 20-22, & 25 (and dependent claims 2-15, 17-19, 23-24, 26-27), the art of record does not teach or suggest the recited conversion from a first device-dependent colorant space to a second device-dependent colorant space with the recited selection of a particular set of colorant values in the first colorant space and the recited modification of the transformation for the selected set of colorant values.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Krabbenhof et al (each), Fujita (each), and Kulkarni disclose examples of color space conversion.

7. Any inquiry concerning the contents of this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 571-272-7430.

Any inquiry relating to the status of this application or proceeding or any inquiry of a general nature concerning application processing should be directed to the Tech Center 2600 Customer Service center at 571-272-2600 or to the USPTO Contact Center at 800-786-9199 or 571-272-1000.

The examiner can normally be reached on weekdays 8:00-5:30, alternate Fridays off.

The examiner's unit designation has been changed from "Art Unit 2624" to "Technology Division 2625" (as of March 20, 2006).
